SAN ANTONIO LANDS NEW AIRLINE

Frontier Adds Two Non-Stops to Denver

The push to bring even more non-stop flights to San Antonio took a huge step forward this week with a major announcement from Frontier Airlines. Two daily flights from Frontier will connect the Alamo and Mile High Cities starting on June 26th. And the connection will be made with more than a few “extras”. Frontier’s new Airbus aircraft features everything from 33 inches of legroom to 24 channels of live TV and pay-per-view movies. “In just a little more than a decade Frontier has managed to build an operation that’s already reaching 44 destinations in 25 states and five cities in Mexico,” said San Antonio Aviation Director Kevin Dolliole. “We’re happy to be part of Frontier’s continued growth.” The Denver-based Airline will offer the following flight schedule starting June 26th:

Denver (DIA) to San Antonio (SAT)
Departs at 3:20 pm - Arrives at 6:20 pm
Departs at 7:10 pm – Arrives at 10:10 pm

San Antonio (SAT) to Denver (DIA)
Departs at 6:30 am – Arrives at 7:40 am
Departs at 7:00 pm – Arrives at 8:10 pm

And the good news at San Antonio International Airport seems to be non-stop as well. In addition to the Frontier announcement, 2005 has already seen Delta Airlines start non-stop service to Salt Lake City, Utah. And

United Airlines just recently announced new non-stops to both Los Angeles and San Francisco, California. Combine those announcements with a First Place finish in J.D. Power & Associates 2004 Global Airport Satisfaction Study, and you see why the level of optimism is flying high at San Antonio International Airport. San Antonio Mayor Ed Garza summed up the latest announcement from Frontier this way. “Airline customers aren’t just asking for more choices and lower prices these days, they’re now demanding it,” he says. “This move from Frontier puts San Antonio International Airport in an even better position to meet that demand.”
